Average time under x-ray	3 m 16 s	
Physician satisfaction with Bedrock services*	100%	
Website	Patient focused	

\*Some lithotripsy providers are owned by physicians, which may result in satisfaction surveys that are biased.

As the patient, you can choose your lithotripsy provider and your physician. If you would like your procedure to be performed by Bedrock Lithotripsy, but your physician insists on using another company, you are free to select another physician. Although many physicians who use us are not listed on our website, a few are.

Ask your physician if they have privilege to treat kidney stones at a Providence Hospital. If that is your preferred hospital, there is no reason your physician cannot request us to give you the best chance for a successful treatment.
